

Club Criteria

Criteria	Bronze Tier	Silver Tier	Gold Tier
Social Media Promotion	At least one post per semester promoting environmental awareness/campaigns	At least two posts per semester promoting environmental awareness/campaigns	At least three posts per semester promoting environmental awareness/campaigns
Community Outreach	Promote a sustainable community specific project in or around the local area	Set up/partake in a sustainable community specific project in or around the local area	Gain sponsorship / funding / create continuing partnership with a local sustainable group.
Participation in Sustainability Training	Have 25% of committee participate in sustainability training, including one of your signatories	Have 50% of committee participate in sustainability training, including one of your signatories	Have 75% or more of your committee participate in the training, including all of your signatories
Travel	Record club emissions using the club emissions document on the club's Teams Channel	Offset club emissions, including individual travel to training/fixtures etc.	Evidence that the club are not only offsetting emissions, but actually reducing emissions as a whole (more cycling to training/matches, more car shares if cars are needed, etc.)
Kit/Equipment	1 example of club kit being repaired or sourced sustainably instead of purchasing new kit	2 examples of club kit being repaired or sourced sustainably instead of purchasing new kit	3 examples of club kit being repaired or sourced sustainably instead of purchasing new kit AND Sort through current equipment and donate any to local clubs/schools/charities that isn't used
Hosting/participating in a campaign or event	Support another club's sustainable campaign or event (e.g. attend their beach clean)	Run a sustainable campaign (e.g. campus and surrounding area clean and sustainability has been considered in the planning of the event)	Club runs multiple campaigns/events throughout the year which could include collaboration with external organisations
Club Operations (e.g. waste)	Sustainability pledge included in club code of practice and sustainable goals set in club development plan	Evidence of at least one of their sustainable goals completed	Evidence that multiple club sustainable goals have been achieved and the impact of at least one of those is high e.g. equipment recycling scheme vs switching lights off AND Have a committee member who is responsible for sustainability of the club
Food Education	Educate members on food waste and how this can be reduced. Educate members on the sustainability of your food (meals with lower carbon footprint/educational posts on Meat vs dairy vs veggie etc).	Show that the sustainability of food options have been considered for trips and events e.g. Christmas/Summer balls, weekend trips (more veggie options than Meat for example or less red Meat etc)	Organise an event/participation week for members relating to food waste e.g. food bank, trying to live below the poverty line for a week, putting all your waste into one jar for a week/meat free month/week/mondays
Socials (costumes, drink containers, etc)	Show how sustainability has featured as part of the social planning (e.g. recycling)	Plan a social dedicated/themed to sustainability	Plan 2 or more socials dedicated/themed to sustainability
Biodiversity	Raise awareness of biodiversity and how sport impacts this within your club	"Leave no trace" rule adopted at all club activity i.e. no litter left behind, no spillages	Improve biodiversity net gain through a physical project or fundraiser e.g. fund a project on Ecologi (separate to offsetting emissions)
